

Quick Cut Water Jet Cutting Services (Pty) Ltd is a newly opened Precision Water Jet Cutting company.

We opened our doors on the 18th November 2008 and are located on the premises of Bellow Weld (Pty) Ltd.

We have recently commissioned an OMAX 80610 Water Jet Cutting Machine Centre from Omax International who are based in Seattle, United States of America.

This machine is capable of cutting up to 150mm of mild steel & up to 120mm of various stainless steel with a mixture of High Pressure Water and Microblast Granite.

This machine can take up to a 4m X 2m plate, therefore getting maximum usage of the material, if large quantities are needed.

We can cut the following materials:

- Mild steel
- Stainless Steel
- Alloys
- Aluminium
- Glass
- Wood
- Almost anything

Our Staff have been fully trained on the Omax 80610 by Omax International at their Head Office Training Centre in Seattle, US.

Whether it be anything from flanges or something smaller, to a keyring or a Flaming Eagle, to your company's name cut out in steel, this machine can cut it.

If you have any queries, or you need to request a quotation to compare our prices to your current supplier, please email Simon Bradley on sbradley@mweb.co.za or contact Helen on 016 365 5357.
